First half mile same as last described.

Last half mile level 2^d rate land, timber

same as last described, November 16, 1838

Surveyed.

General description.

The largest portion of the land in this township is 2^d rate and very rich. Soil from 8 to 10 inches deep.

The prevailing timber is Beech, Elm & Maple in the flat land, and Sugar & Poplar on the rolling. The timber is large & tall.

Boulders of Granite rock are common throughout the township.

Water is scarce now, but rather too much of it in the Spring season of the year, on the flat land.

The S.W. quarter of Sec. 6 has a fine mill seat on it.

I hereby certify that in pursuance of a contract with Robert T. Lytle, Surveyor General of the United States for the States of Ohio, Indiana and Michigan, bearing date the 10th of May 1838; and in strict conformity with the laws of the United States and the Instructions of said Surveyor General, I have surveyed and subdivided into sections Township N. 24 North in Range N. 2 East of the 2^d Principal Meridian, in the State of Indiana; and I do further certify that the foregoing are the true and original field notes of said survey and subdivision executed as aforesaid.

Certified this 10th day of November 1838

Arthur St. C. Vance

Deputy Surveyor.
